

# Dysfunctional Letterforms

www.educationalfontware.com | 800-806-2155

Dysfunctional Letterforms is a set of 12 fonts that could be used by an OT when preparing reports on the computer to show how a child is forming letters incorrectly (reversals, upside down letters, ...). No longer does the OT have to print a copy of the description, handwrite the problem letters, scan it back in, etc.

All the font names below start with "Dysfunctional."
